Damián Ariel Ponce

Full-Stack Developer · React · Next.js · Firebase · React Native

damianponce.com · github.com/damiponce · linkedin.com/in/damianponce
dami.ponce8@gmail.com · Buenos Aires, Argentina (UTC−3)

Full-stack developer with 4+ years of paid client work, shipping web and mobile products end to end: from UI and backend to cloud functions and ESP32-connected devices. Avionics technician background and bilingual Spanish/English (C2).

Work Experience

Encuentro Tanguero del Interior (ETI) Jun 2025 – Present
Full-Stack Developer – Event management platform *Remote*
- Designed and built the platform end to end: **2,000+ registered users**, up to **1,000 monthly active users** at peak.
- On-call during event registrations for last-minute critical fixes with live user data.
- Next.js, React, TypeScript, Firebase (Auth, Firestore, Cloud Functions).

Freelance – Full-Stack Developer 2022 – Present
Web, mobile and IoT projects for clients in Argentina and Chile *Remote*
- **IoT device + companion mobile app for a hardware startup:** Expo / React Native app for iOS and Android, ESP32 Wi-Fi provisioning over SoftAP, device ownership and a Firebase Cloud Functions backend.
- Delivered **10+ websites** with Next.js, Tailwind CSS and Sanity CMS on Vercel.
- Building a CMS-backed website for a university research lab, editable by its members.

GMF – Laboratorio de Aerodinámica y Fluidos – UTN FRH 2024 – 2025
Front-End Lead – Web simulation suite for battery systems *Haedo, Buenos Aires (Hybrid)*
- Led the browser front-end (React, Next.js) on top of a Python/Trame scientific visualization backend.

Villafuerte Solutions Dec 2022 – Jan 2023
Spanish – English Interpreter *Miami, FL, USA (Remote)*
- Real-time interpreting between US service providers and their Spanish-speaking clients.

Projects

SatView – Satellite Viewer | *Next.js, three.js / R3F, Rust → WebAssembly, Postgres* | Link 2023 – Present
- Real-time orbital propagation with *satellite.js*; per-frame math offloaded to Rust/WebAssembly.
- Deployed on Vercel with a Postgres daily data cache refreshed on user traffic.

Homelab & IoT | *Linux, Docker, Raspberry Pi, Home Assistant, Grafana, InfluxDB, MQTT, ESP32* Ongoing
- Self-hosted services on a Raspberry Pi (media server, home automation, metrics dashboards) and a NAS build.
- ESP32 devices: load-cell coffee scale (HX711, OLED) and a weather station reporting over MQTT.
